DETAILED ACTION

Allowable Subject Matter

1. Claims 3-24 allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 3-10, 12, and 23 are allowed because none of the prior art of record discloses or suggests the step of determining a first constant from the measured values for the linear variation of the compensation AC voltage with the total value of the alternating current and $\cos(\phi)$ from the measured values, in combination with the remaining claimed features.

Claim 11 is allowed because none of the prior art of record discloses or suggests the voltage source being a rotating frequency converter, or the step of varying an exciting power of a generator to achieve a variation of the compensation AC voltage, in combination with the remaining claimed features.

Claims 13 and 14 are allowed because none of the prior art of record discloses or suggests determining a first constant C_R as $(|U_{full}| - |U_{load}|)/|I|$, determining a second constant C_L as $[|U_{full}| - |U_{load}| - C_R * |I| * \cos(\phi)]/[|I| * \sin(\phi)]$, and repeatedly calculating a compensation AC voltage as $|I| * C_R * \cos(\phi) + |I| * C_L * \sin(\phi)$, in combination with the remaining claimed features.

Claims 15-22 and 24 are allowed because none of the prior art of record discloses or suggests the claimed means for varying, once the variable load is connected instead of the ohmic load via the supply line to the AC voltage source, the compensation AC voltage depending both on an absolute value of an alternating current

conducted to the load and on a phase angle ϕ between the output AC voltage of the voltage source and the alternating current, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see Remarks, filed November 17, 2006, with respect to the objections and rejections have been fully considered and are persuasive. The objections to claims 6 and 18 and the rejections of claims 3-10, 12, and 15-22 have been withdrawn.
